## Powerful Network Cost Management

Are you trying to make sense of an overwhelming amount of data using manual or inefficient processes? Now, more than ever, Service Providers must contain costs to improve margins, but most lack easy access to real-time usage, trends and patterns to increase network efficiency.

Connectiv Solutions' netCLARUS provides you with that ready access plus the ability to analyze billions of records to help identify, monitor and reduce variable network operating expenses and positively impact your profitability.

A web-based network monitoring and analysis solution, netCLARUS' specialized modules for Traffic Management and InterConnect Management are flexible, scalable and available as a SaaS solution – eliminating extra infrastructure costs and maintenance.

### Why Connectiv Solutions?

Connectiv Solutions has been helping the telecommunications industry contain costs and improve revenues for 10 years. We've helped some of the largest Service Providers in North America understand their variable usage cost and eliminate \$100s of millions in expenses. Our solutions and services analyze nearly 10 billion CDRs a month supporting the goals of Carrier Management, Engineering, Finance, Strategy and IT at Service Providers.

### Learn More

Contact Connectiv Solutions to find out more about netCLARUS and its modules or visit [www.connectiv-solutions.com](http://www.connectiv-solutions.com)

### netCLARUS TRAFFIC Module

- Identify cost savings in local, LD and SMS usage.
- Optimize Traffic Cost Management
- Prioritize Voice Peering
- OPEX Reduction and Profit Maximization

### netCLARUS INTERCONNECT Module

- Managing costs and Intercarrier compensation
- Provide a negotiating edge
- Monitor and Reconcile Inter-carrier Costs
- Interactive Management of Inter-carrier Agreements (ICAs)

### BENEFITS

- Real-time call detail record (CDR) access, collection and processing
- Visibility into key financial and engineering metrics via overlays
- Powerful cost management for Traffic and InterConnect
- Centralized enterprise solution
- Modular design to align with business unit challenges
- Software-as-a-Service (SaaS) approach
- Powerful yet easy-to-use graphical user interface (GUI)
