Dynamically monitor contract ratios across your network to ensure compliance and lowest cost.

Negotiating Edge

netCLARUS INTERCONNECT provides enhanced visibility and reporting on usage and contractual metrics so you can negotiate with confidence. With netCLARUS, you'll streamline in-bound and out-bound traffic analytics by switch, switches or OCN with an independent local number portability (LNP) dip.

It provides a flexible determination for both origination and termination locations and accurately determines Percentage Local Usage (PLU), Percentage Mobile-to-Land (PML) and Percentage Interstate Usage (PIU) ratios.

Monitor and Reconcile Intercarrier Costs

netCLARUS INTERCONNECT streamlines the invoice to actual reconciliation. Collecting data from multiple sources, you can quickly identify billing discrepancies and create dispute reports.

Accurate Reciprocal Compensation Analysis

netCLARUS INTERCONNECT eliminates any uncertainty to what your contractual ratios should be to support reciprocal compensation. Teams will quickly benchmark against existing contractual ratios on a per ICA basis and prioritize based on savings potential.

Why Connectiv Solutions?

Connectiv Solutions has been helping the telecommunications industry contain costs and improve revenues for 10 years. We've helped some of the largest Service Providers in North America understand their variable usage cost and eliminate \$100s of millions in expenses. Our solutions and services analyze nearly 10 billion CDRs a month supporting the goals of Carrier Management, Engineering, Finance, Strategy and IT at Service Providers.
